

Evaluation & Next Steps

Purpose

While we are often ready to move from an intervention to the next step or to another client, it is important to build the stage of evaluating into your consultation. Did you achieve the goals you set out to achieve? Do you feel you did all you could? How did it go? Does the client feel fulfilled? Is there more work to be done here?

Objectives

- To understand the success of your consultation
- To understand the impact of your work within the system
- To learn how to turn this feedback into your next piece of work for a family
- To acquire tools to collect data and do an evaluation
